Project Title: Amazon clone

Contributions:

1. Deewan Kumar

- Did HTML and CSS

2. Vinod Kumar

- Did CSS and JS

3. Bharat

- Did HTML

Languages Used:

- HTML
- CSS
- Java script

Functionality:

• **Overview**

This is a simple, latest Amazon-style clone website. It includes basic Amazon functionalities such as a sliding product bar, search bar, add-to-cart button, product details, and more.

• **Product Browsing**

Users can view a list of available products.

- Each product displays:
 - Name
 - Image
 - Price
 - Short description
- Clicking on a product opens a detailed product page.

• **Search Feature**

- A simple search bar is included.
- It accepts user input but is **not functional** yet.

- **Shopping Cart**

- Displays all products added by the user.
- Users can modify the quantity of items in the cart.
